

# teenventure

## trip highlights

March 10, 2023

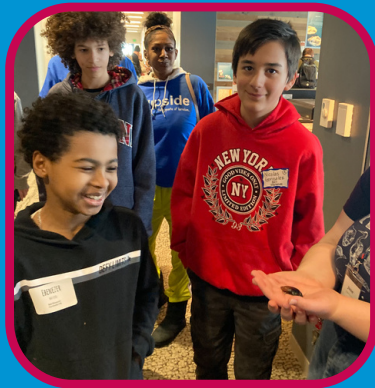

110 youth had opportunities to explore future career options through Teenventure. Radio broadcasting was the focus at the Pavak Museum. Youth participating at the Bricklayers & Allied Craftworkers Training Center got hands on by constructing a brick wall and cutting tile. The Bell Museum Planetarium journeyed to Mars and taught about traveling through outer space. At the Finishing Trades Institute youth had the opportunity to learn about internships and careers in a variety of areas such as window installer and drywaller.
