

Parent Information

Hello,

This is _____ (teacher's name). I am calling to gather your insights regarding (child's) educational progress. This information will be used to better understand how to support his/her educational needs. At our school, we believe that the best way to support student learning is to take a whole child approach including the child's strengths, interests and learning history through home and school perspectives.

In looking at (child's) progress at school, I have noticed (state something positive). I've also noticed that struggles in some areas, _____. I specifically wanted to discuss these concerns with you.

The information that you provide along with current classroom data will be shared with our Student Assistance Team (SAT). The SAT consists of teachers and support staff meet weekly to assist with understanding student learning concerns and identifying interventions that target these concerns.
