

# Computer Repair in the Twin Cities

*Hubbs Center has provided this list because we know students sometimes need computer repair and these local shops do not charge for repair estimates. They will tell you how much your repair will cost before you agree to have them do the work.*

*Students should get more than one estimate and understand the services promised before choosing a repair shop. Hubbs Center is not officially connected with these shops. We provide this list as a courtesy only.*

**PCs for People** - 1481 Marshall Avenue, St. Paul
