

Here is a quick diagram to remind you of your gig line. Remember that the rounded edge of the belt buckle is the part that should connect the front fold of your shirt and the fly of your pants. The silver tip of the end of the belt should not be farthest away from the gig line; there should be no blue belt material between the belt buckle and the tip of the belt, it should be metal to metal, but the metal frame from behind the belt buckle (where the oval cut out is) should not be visible either.

NOTE: Male metal tips will be to the wearer's left
Female metal tips will be to the wearer's right

Use this handy guide to learn to tie a Windsor Knot:

THE WINDSOR KNOT Wide and triangular—
for wide-spread shirt collars.

YOUR LEFT IN MIRROR **YOUR RIGHT IN MIRROR**

- 1** Start with wide end of tie on your right and extending a foot below narrow end.
- 2** Cross wide end over narrow and bring up through loop.
- 3** Bring wide end down, around behind narrow and up on your right.
- 4** Then put down through loop and around across narrow as shown.
- 5** Turn and pass up through loop and ...
- 6** Complete by slipping down through the knot in front. Tighten and draw up snug to collar.

A series of six numbered illustrations showing a man's head and shoulders as he ties a Windsor Knot. Step 1: The wide end of the tie is on the right, extending below the narrow end. Step 2: The wide end crosses over the narrow end and goes up through the loop. Step 3: The wide end goes down, around the back of the narrow end, and up on the right. Step 4: The wide end goes down through the loop and around the narrow end. Step 5: The wide end turns and goes up through the loop. Step 6: The wide end slips down through the knot in front, and the knot is tightened.
