

Top-It

To play “Top-It”, students will need:

- Everyday Math card deck with cards 0-10 only (or a regular deck of cards) As the year goes on and your child is able to work with larger numbers, add back in all the cards. For a regular deck of cards, J=11, Q=12, K=13, A=1).

Rules:

- Each player draws a card, says the number and lays the card down in front of them.
- The player with the largest number wins all the cards. Lay the cards won in a pile by you.
- If two players tie with the largest number, they each draw another card. The player with the larger number then takes all the cards.
- Play ends when no more cards remain to be drawn. The player who has the most cards wins.

*Enrichment: Each player draws 2 cards and adds them together. Player with the largest total, or sum, wins the cards.
